

Management of Complex Contaminated Land Sites

We provide alternative, bespoke approaches to solving the environmental challenges of complex remediation projects

Precise measurable benefits

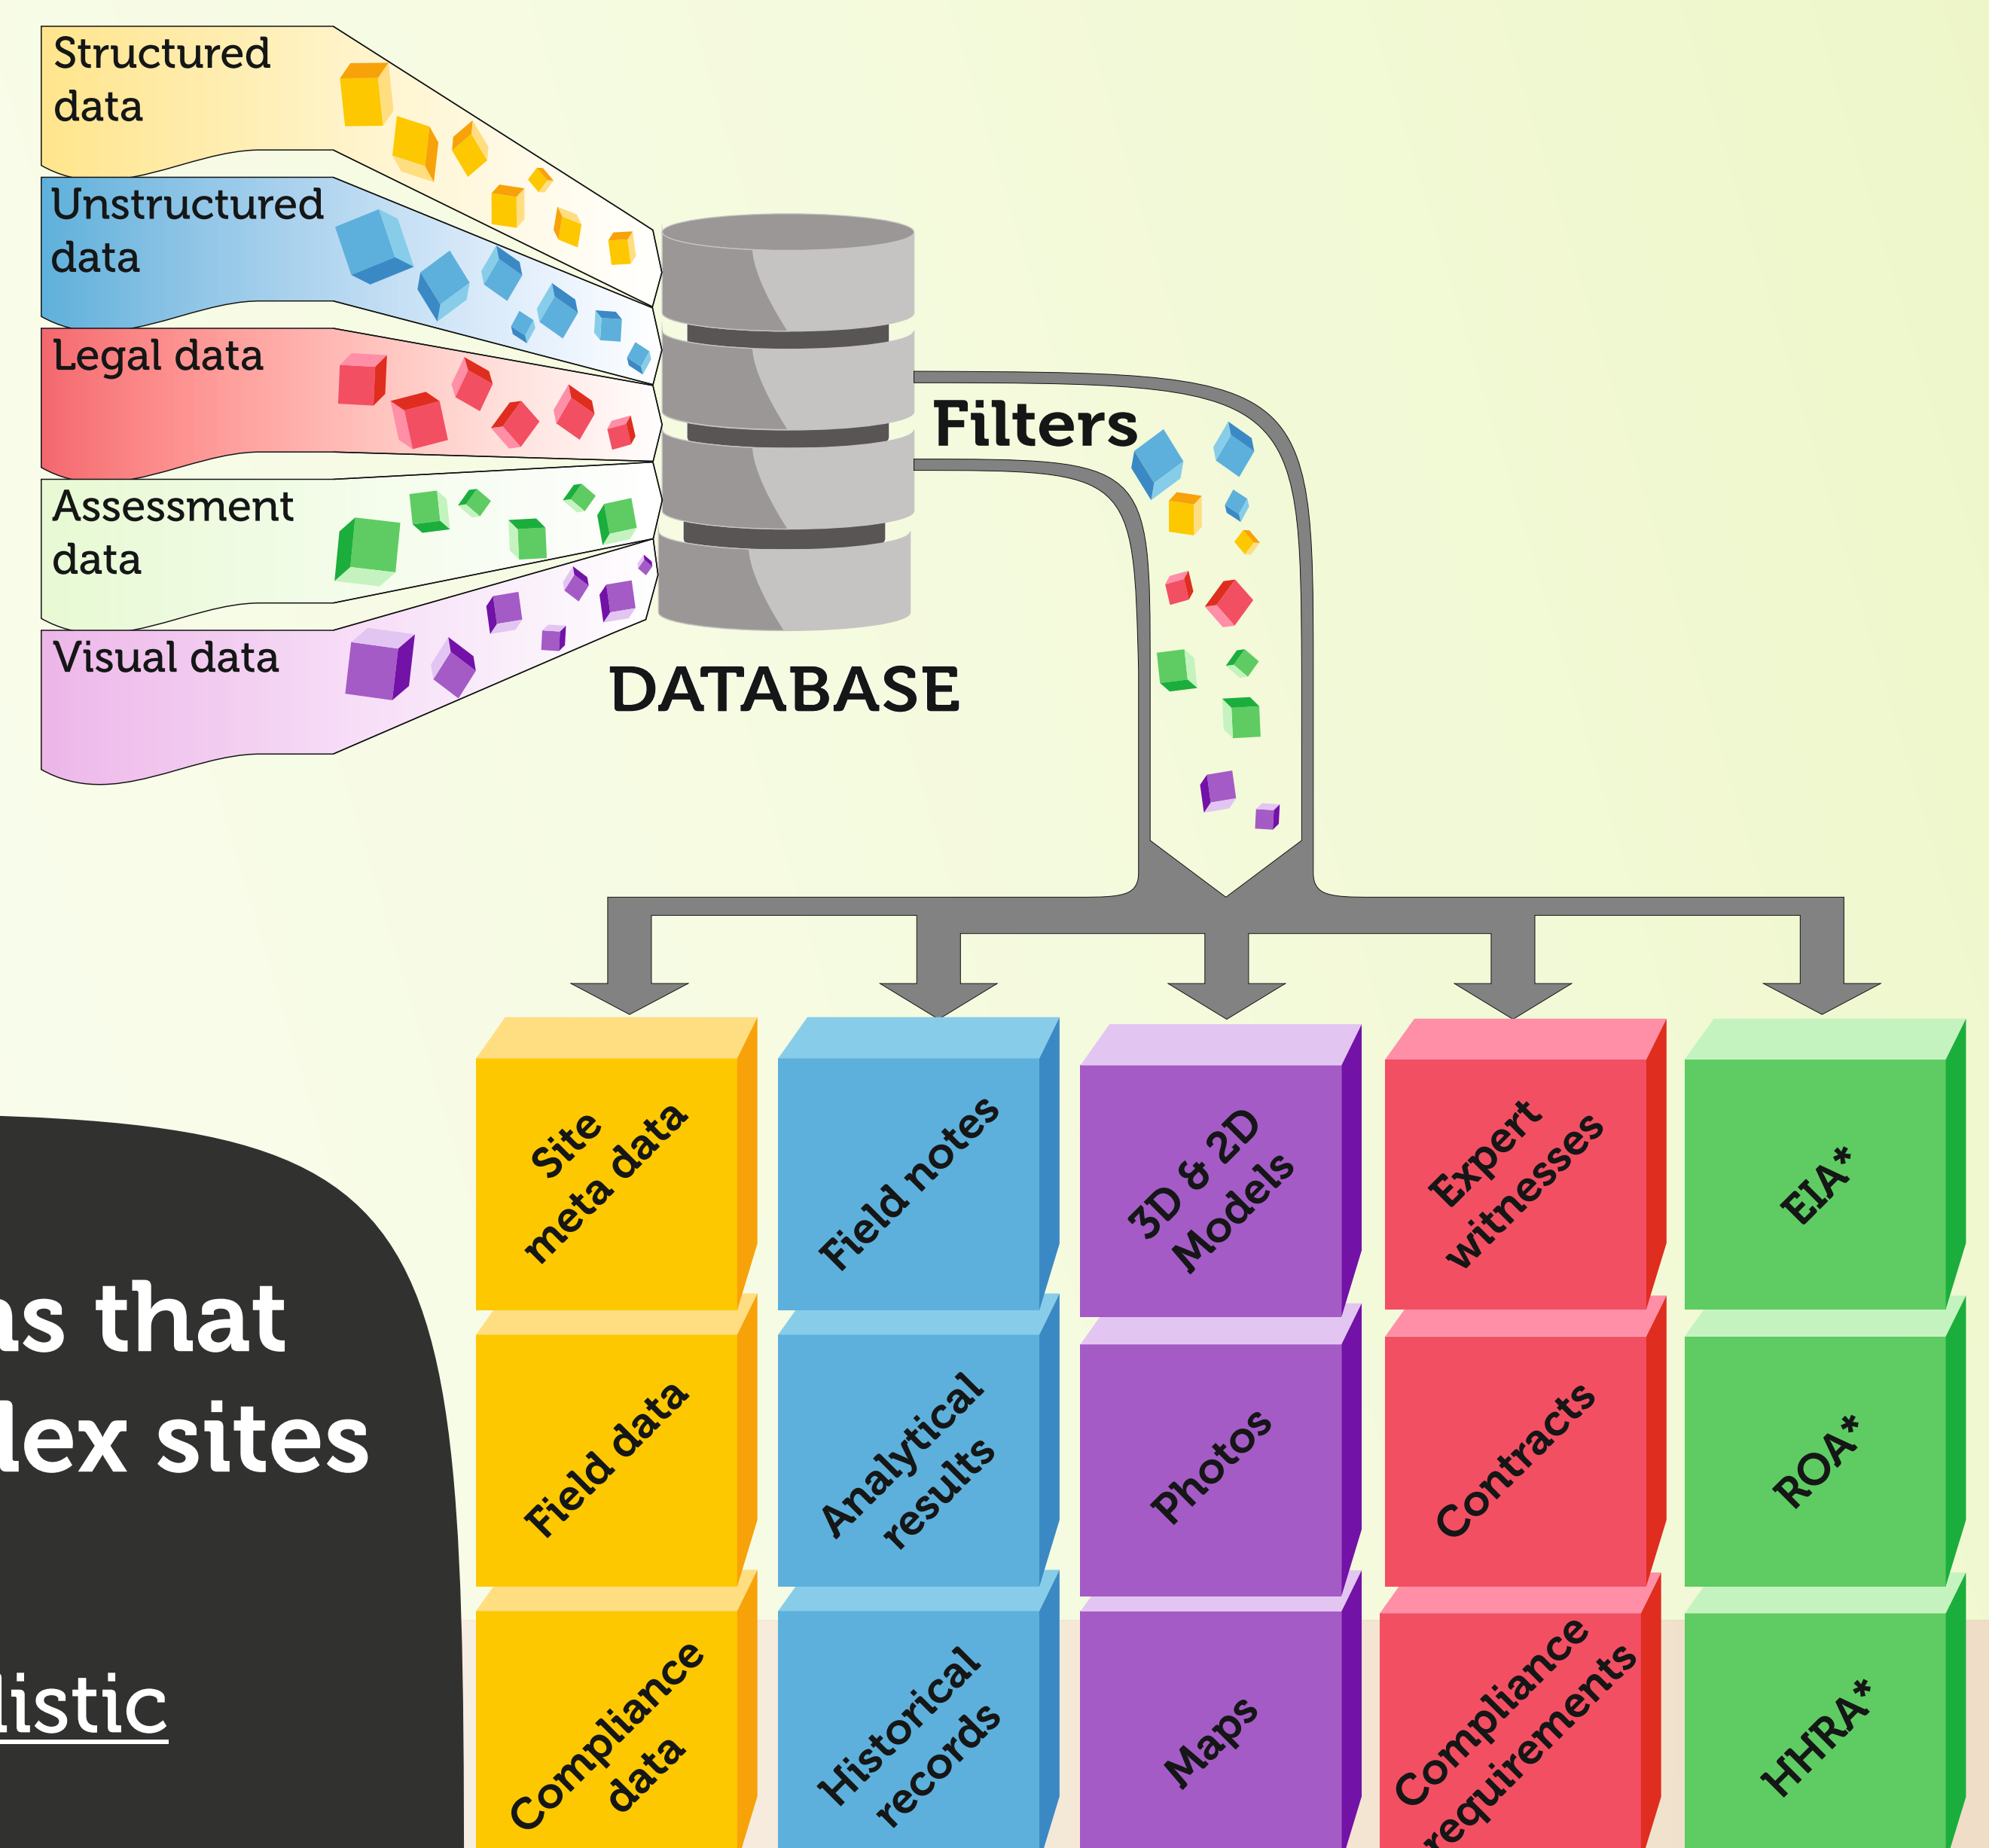

Protect receptors, minimize irrelevant scope and accelerate site closure.

Closure of Landfill 227 in Castleford

Real time actionable intelligence

The right information, at the right time to the right person, in the right format.

Common problems that make closing complex sites difficult:

- ❌ Conflicting and unrealistic objectives;
- ❌ Impractical and overly simplistic metrics;
- ❌ Incentives that favour ever-expanding scopes;
- ❌ Unnecessary friction in converting data to actionable intelligence.

Performance simplicity

We use readily available, open source and inexpensive technology that can be applied to any site.

Excavation (Landfill)

Pump & Treat

Soil Washing

Bioremediation

Phytoremediation

Effective feedback

We are experts in the qualitative and quantitative analysis of uncertainty in relation to performance, schedule and cost.
